

ABSTRACT

Clothing Rental Marketplace Platform is an online platform designed to provide users with an easy and affordable way to rent clothing for various occasions instead of purchasing expensive outfits. The system connects customers with clothing owners, rental shops, and vendors through a centralized digital marketplace.

Users can browse different categories of clothing, such as traditional wear, formal wear, party wear, wedding outfits, and designer dresses. They can view product details, rental prices, available dates, and rental duration before placing an order. The platform also allows vendors to list and manage their clothing items.

The system includes features such as user registration and login, clothing search and filtering, booking management, payment processing, rental duration tracking, return management, ratings, and reviews. An administrator manages users, clothing listings, bookings, and overall platform activities.

The main objective of the Clothing Rental Marketplace Platform is to promote affordable fashion and sustainable clothing usage by reducing unnecessary purchases. This platform provides a convenient, cost-effective, and efficient solution for customers while creating business opportunities for clothing owners and rental service providers.
